

James Hollingsworth

Singer/Songwriter/Guitarist/Harmonica-player

Technical Requirements

VOCAL

2 x vocal mics (for voice and harmonica).

Preferably for the above I'd like a **return from the desk** to my Vocal Stereo Multi-Effects on the stage (they use 1/4" jack in/out), the outputs for which would therefore require two DI's.

GUITAR

I have 3 x XLR outputs direct from my pedal board (therefore DI boxes are NOT required for the guitar).

Info: Two of these outputs are from Stereo Multi-Effects and the other is from a Distortion effect via a Volume Pedal.

Alternatively...

Please advise in advance so I can bring the extra gear required

I can also be entirely self-contained, supplying mic's and stands and sub-mix everything from the stage. I'll give the engineer a stereo signal (as two XLR's or 1/4" jacks).
